

Secure Multi-Cloud Environments Workshop

Get a customised threat & vulnerability analysis of your hybrid and multi-cloud environment and learn how to build a more robust cloud security system.

Workshop highlights

Discover threats and vulnerabilities in your hybrid environment.

Learn how to prioritise and mitigate potential threats to your servers and services.

Understand what can be done to reduce the attack surface area for hybrid workloads.

Learn about the benefits and capabilities of Microsoft Defender for Cloud.

Develop defined next steps based on your needs and objectives.

Do you have a good understanding of security vulnerabilities in your hybrid and multi-cloud environment including VMs, databases, Azure storage and more? Are you aware of the number of suspected authentication activities across your multi-cloud environment? In short, are you confident about the cloud security posture of your organisation?

Improve your cloud security posture with a Secure Multi-Cloud Environments Workshop

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your hybrid and multi-cloud security objectives—and identify current and real threats—by scheduling a Secure Multi-Cloud Environments Workshop.

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft experts in security.

You'll gain visibility into immediate threats and vulnerabilities across Azure, on-premises and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, apps, endpoints, and infrastructure, it's essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you'll be able to:

Identify current security threats and vulnerabilities in your hybrid and multi-cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security priorities and needs for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest tools

What to expect:

During this-workshop, we'll partner with you to strengthen your organisation's approach to hybrid cloud security. We'll then help you to better understand how to prioritise and mitigate potential attacks. We will:

- **Analyse** your requirements and priorities for a hybrid cloud security detection and response solution.
- **Define Scope** & deploy Microsoft Defender for Cloud in the production environment, onboarding servers and other selected services.
- **Discover** existing hybrid workload vulnerabilities and advise how to reduce the attack surface area.
- **Discover** threats to the included hybrid workloads and demonstrate how to investigate and respond to threats.
- **Recommend** next steps on proceeding with a production deployment of Microsoft Defender for Cloud.

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer
- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Why Threatscape?

Threatscape is the trusted security partner of enterprise clients who rely on us to secure critical IT assets in over 100 countries around the world. We are one of very few dedicated cyber security companies with a separate Microsoft Security Practice, and our expertise in this space is reflected in our status as a Microsoft Security Gold Partner and Global Microsoft Security & Compliance Partner of the Year 2020.
